# *Weekly* MORBIDITY REPORT

SHORE STATIONS IN CONTINENTAL UNITED STATES

NAVMED 104

WEEK ENDING 5 October 1946REPORT NO. 249

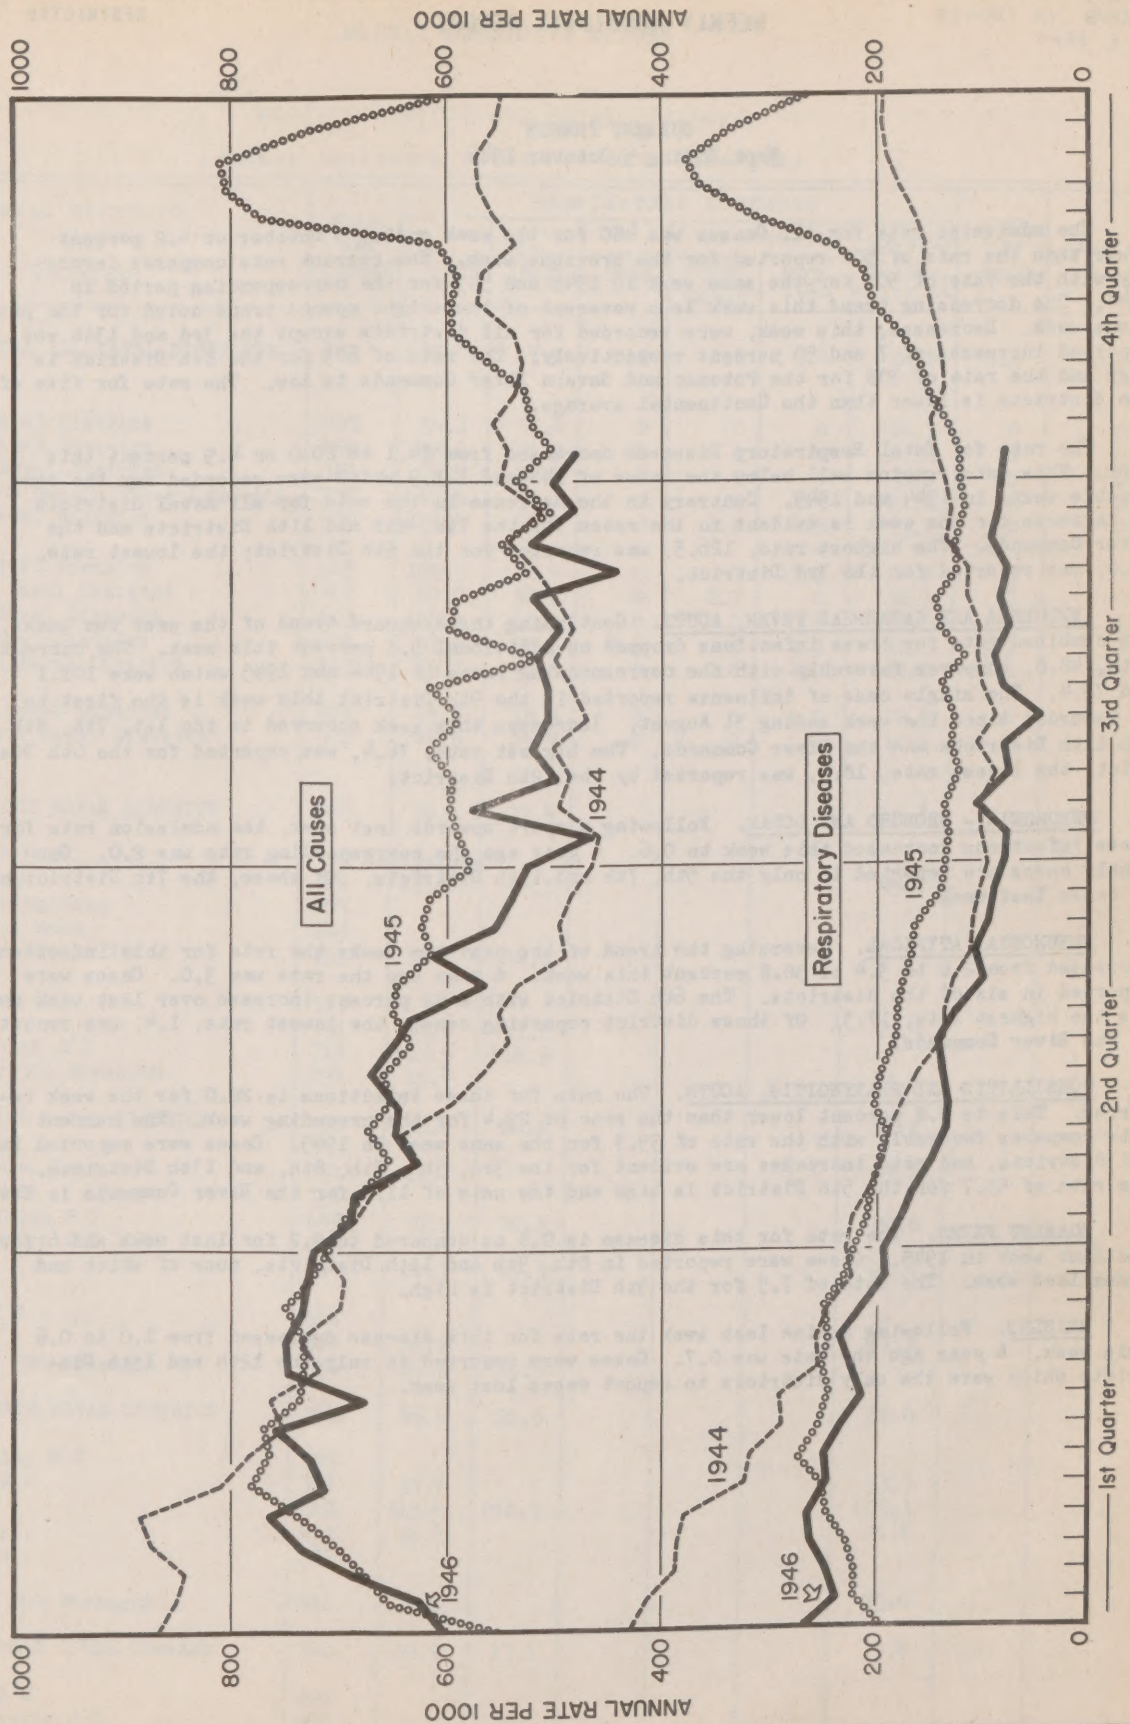

**RESTRICTED**—THE INFORMATION IN THIS REPORT IS NOT TO BE COMMUNICATED DIRECTLY OR INDIRECTLY TO THE PRESS OR TO ANYONE NOT IN THE ARMED FORCES

## ADMISSION RATES—ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES—1944, 1945, 1946

WEEKLY MORBIDITY REPORT

RESTRICTED

CURRENT TRENDS

Week Ending 5 October 1946

The admission rate for All Causes was 480 for the week ending 5 October or 4.2 percent lower than the rate of 501 reported for the previous week. The current rate compares favorably with the rate of 505 for the same week in 1945 and 543 for the corresponding period in 1944. The decreasing trend this week is a reversal of the slight upward trend noted for the previous week. Decreases, this week, were recorded for all districts except the 3rd and 13th who reported increases of 7 and 50 percent respectively. The rate of 603 for the 8th District is high and the rate of 308 for the Potomac and Severn River Commands is low. The rate for five of the districts is lower than the Continental average.

The rate for Total Respiratory Diseases decreased from 84.1 to 80.0 or 4.9 percent this week. This rate remains well below the rates of 144 and 123.9 which were recorded for the comparable weeks in 1944 and 1945. Contrary to the decrease in the rate for all naval districts, an increase for the week is evident in the rates for the 7th, 8th and 11th Districts and the River Commands. The highest rate, 126.5, was reported for the 5th District; the lowest rate, 38.6, was reported for the 3rd District.

INFLUENZA AND CATARRHAL FEVER, ACUTE. Continuing the downward trend of the past two weeks, the combined rate for these infections dropped an additional 5.3 percent this week. The current rate, 48.0, compares favorably with the corresponding rates of 1944 and 1945 which were 101.1 and 79.4. The single case of influenza reported in the 9th District this week is the first to be recorded since the week ending 31 August. Increases this week occurred in the 1st, 7th, 8th and 11th Districts and the River Commands. The highest rate, 76.4, was reported for the 6th District; the lowest rate, 18.9, was reported by the 12th District.

PNEUMONIA - BRONCHO AND LOBAR. Following a spurt upwards last week, the admission rate for these infections decreased this week to 0.6. A year ago the corresponding rate was 2.0. Currently cases are reported in only the 5th, 7th and 11th Districts. Of these, the 7th District had no cases last week.

PNEUMONIA, ATYPICAL. Reversing the trend of the past two weeks the rate for this infection increased from 2.6 to 3.4 or 30.8 percent this week. A year ago the rate was 3.0. Cases were reported in six of the districts. The 6th District with a 92 percent increase over last week now has the highest rate, 17.3. Of those district reporting cases, the lowest rate, 1.4, was reported by the River Commands.

TONSILLITIS AND PHARYNGITIS, ACUTE. The rate for these infections is 28.0 for the week reported. This is 4.8 percent lower than the rate of 29.4 for the preceding week. The current rate compares favorably with the rate of 39.3 for the same week in 1945. Cases were reported in all districts, and rate increases are evident for the 3rd, 5th, 7th, 8th, and 13th Districts. The rate of 53.7 for the 5th District is high and the rate of 11.0 for the River Commands is low.

SCARLET FEVER. The rate for this disease is 0.8 as compared to 0.2 for last week and 6 for the same week in 1945. Cases were reported in 8th, 9th and 11th Districts, none of which had cases last week. The rate of 7.9 for the 9th District is high.

MEASLES. Following a rise last week the rate for this disease decreased from 1.0 to 0.6 this week. A year ago the rate was 0.7. Cases were reported in only the 12th and 13th Districts which were the only districts to report cases last week.
